### Technical Capabilities and Skills

- Operations Management
- Continuous Improvement
- Change Management and Implementation
- Organisational Development Including; Training, Coaching and Mentoring at Different Levels
- Process Development
- New Product Introduction
- Facilities Management and Site Moves
- Value Engineering
- Strategic Planning

### Industry Expertise

Experienced across a wide range of sectors and operation types; predominantly in SME operations working in Oil and Gas Valves, Specialist Automotive / Transportation, tool-making and special purpose machinery. In addition I have worked across diverse manufacturing operations in Aerospace, FMCG and general sub-contract engineering.

### Recent Achievements

- Driving the operational change of a North West based manufacturer in doubling its revenues to £13m within a 3-year period.
- Managing the development of an award-winning industry leading product range in the Specialist Automotive / Transportation industry.
- Leading two factory moves on-time and under budget.
- Created and delivered bespoke Manufacturing training programmes for European Aerospace supply chains to enable new diversified off-shored operations.
- Cost Reductions of over 35% in product assembly operations, through process redevelopment via team-engagement exercises.
